**PRESS RELEASE**

**Q'Straint successfully launches two new products at Euro Bus Expo**

Q'Straint successfully launched two new products at Eurobus Expo this week – the QM3 wheelchair securement solution and the revolutionary Flex-i-Trans flooring system. The QM3 provides a fully tested and universal system for efficient and safe securement of wheelchairs on low floor city buses, trams and trains. Flex-i-Trans delivers a unique solution that provides maximum internal layout versatility for accessible vehicles and can be fitted to a wide selection of models including variants from the Ford Transit, Volkswagen Crafter and Mercedes-Benz Sprinter ranges.

Phil Stratton, UK and Ireland Sales Manager commented, "We have been extremely busy for all three days of the show as these two new Q'Straint solutions have generated high levels of interest. Here in the UK, Eurobus Expo continues to be the ideal platform for us to launch new products into the market as the quality of visitors remains high. We have already taken orders for both systems and feel confident that both the Q'Straint QM3 and Flex-i-Trans will become first choice respectively for specifiers."
